## Course Objectives

An intensive four-day course to introduce you to the necessary skills to complete a systematic review.

- Introduction to systematic reviewing and developing a protocol
- Literature searching and selection of studies
- Critical appraisal of quantitative and qualitative data
- Extracting data
- Meta-analysis or narrative synthesis
- Reporting and disseminating results

## Interactive Skill Development

Participants come to the course with a research topic and leave with a draft protocol for their systematic review.

## Study Methods

- Small group teaching
- Workshops
- Interactive tutorials with hands-on practical work
- Group work

## Target Audience

The course will appeal to all those interested in undertaking a systematic review, of particular relevance to those with a healthcare background.

- Postgraduate researchers
- Healthcare professionals
- Information specialists and librarians
- Policy makers

## Tutors

Cardiff University's specialist team has extensive experience of undertaking reviews and teaching evidence-based methodologies.
